

# GEARGRID WIRE

GearGrid Athletic Newsletter

Version 1 2018

## Project Spotlight Penn State University, PA

---

Penn State University, PA organizes their athletic equipment storage space with GearGrid **Wall Mount Grid Panels and Shelves**. The open-grid design promotes air movement, which minimizes odor build-up and allows damp equipment to dry faster.

GearGrid storage systems are completely modular and let Penn State University maximize their athletic equipment storage space any way they choose.

---

### Happy New Year!

The entire GearGrid team joins in wishing you a Happy New Year! Every year we are thankful for our valued customers.

Thank you for your continued business and loyalty with us. We hope 2018 brings you much success and happiness.

Miami System — Width: 49.5" Depth: 31" Height: 74.5"

Suffolk System — Width: 49.5" Depth: 31" Height: 82"

## Get Organized with GearGrid's Miami & Suffolk Systems

Athletic facilities are often faced with the same difficult problem: a lack of storage space for team sports equipment. Couple that with the high cost of gear, and the problem of how to properly store and protect that gear can arise.

To help solve this issue, GearGrid developed a line of bulk equipment storage solutions designed to assist in utilizing space effectively and efficiently. All of GearGrid's innovative storage products help you organize your space, while extending the life of your athletic gear and equipment.

The Suffolk and Miami Systems are specifically designed for safe gear storage and transport. The versatility of the systems allows for the storage of a variety of athletic equipment, including uniforms, helmets, footwear, training equipment and electronics. GearGrid storage systems are completely modular, so you can build your system to meet your exact storage needs while properly storing your equipment.

The units are designed exactly the same, with the only difference being the Suffolk can hold six shelves and the Miami can hold five shelves. These systems are available in fixed or mobile configurations and they can be outfitted with or without secure doors. A stainless steel hanging rod can also be added to each unit for quick drying and convenient storage.

GearGrid's Suffolk and Miami Systems are built with durability in mind to stand up to the demands of athletes. GearGrid believes athletes and their gear deserve to be protected and safe. As a proud American manufacturer, GearGrid ensures our storage solutions do just that.

# GearGrid Athletic Pull-Down Topper

## How it works:

- GearTopper is activated by pulling handle forward. Athlete loads the equipment and gently pushes GearTopper upward. GearTopper retracts to closed position on locker top
- Mounts to most manufacturer's athletic lockers (Lockers with sheet steel less than 14 ga. Will require plywood blocking)

## Benefits:

- Safely stores and dries helmets and shoulder pads
- Allows athletes to load helmet and shoulder pads without standing on bench
- Prevents potential injury to athlete and damage to bench

Have you seen GearGrid's  
**NEW Website?**

Our updated website provides athletic directors and coaches with helpful resources and a more user friendly layout. We welcome any feedback regarding the new website or any items you would like to see.
