

The Storage Solution Experts

Strategic Solutions
for Fire Storage

Our Story

With over 100 years in manufacturing excellence, GearGrid prides itself on building all of its products with quality materials and labor in the USA. Our manufacturing facility has state-of-the-art technology, an in-house design team, an on-site powder coating department and a dedication to providing quality products and service comparable to none.

Since 1921, GearGrid, formally known as Mid-Minnesota Wire, has focused on designing and building durable custom wire forms for retail display and Original Equipment Manufacturer (OEM) markets. In 1997, a new product was created at GearGrid. This product was a firefighting storage unit that became an internationally sold product. Eventually GearGrid expanded the division to additional firefighting storage solutions, athletic, public works, automotive, construction and tactical storage solutions, in addition to providing custom retail displays and wire forms.

Today, GearGrid products can be found in national and international markets. As always, GearGrid products are made with the highest dedication to quality and will always be 100% made in the USA.

What We Do

We specialize in the design and fabrication of durable storage solutions for markets that require leading edge solutions. GearGrid is the market leader in the Public Safety, Athletic/Education and Automotive Industries.

GearGrid offers a full line of equipment handling and storage solutions to create a unified look, function and quality standard throughout the station. Factory direct distribution and no reseller network ensures consistent service and pricing across the US regardless of facility location.

SolidWorks is the CAD (Computer Aided Drawing) program GearGrid uses for drawing and documenting products.

Standard Wall Mount Lockers

GearGrid's Standard Wall Mount Lockers come in a variety of sizes to meet your department's exact storage needs. Our patented design promotes maximum air movement, which minimizes odor build-up and allows damp items to dry faster. Above floor mounting eliminates the need for separate base and makes cleaning easier than ever. No matter the size of your space, GearGrid has the perfect storage solution for your department.

Standard Wall Mount Locker Sizes

Tube Wall Support Structure

The GearGrid Free Standing Tube Wall Structure (FSTWS) provides an additional and alternative mounting option for our Standard Wall Mount Lockers. The FSTWS uses heavy-duty floor mounting plates to securely attach the frame structure to the floor in any desired location, while maintaining the benefits of typical wall mount installation. The FSTWS allows lockers to mount on one or both sides of the structure, and will be engineered for your desired layout, locker size and quantity.

Size: Determined by locker layout

Construction: Units shall be welded at all applicable joints. Use of fasteners will only be required to allow for knock-down shipping, securing units to mounting surface and on applicable accessories

- Vertical Posts: 4" x 4, .250 wall thickness ASTM A513 steel tube
- Floor Mounting Plates: 1/2" steel plate welded to vertical posts. 3/16" mounting holes as needed *Note: Mounting plate hole configurations subject to locker layout
- Horizontal Frames: 4" x 4, .1875 wall thickness ASTM A513 steel tube. Frames mechanically fastened to vertical posts with supplied or identified hardware *Note: If Power Bars (Electric Raceway) are used, top horizontal frame will be 6 H x 4 W, .1875 wall thickness steel tube

Safe Storage for Personal Items

Furring System

GearGrid's Furring System is the ideal solution for mounting to walls with exposed conduit, pipes, or other obstructions. Available in standard wall and floor offsets from 2" to 8" (vertical & horizontal).

Standard Mobile & Free Standing Lockers

GearGrid's Standard Mobile & Free Standing Lockers offer the strength, durability and open design of our Standard Wall Mount Lockers while adding unlimited placement flexibility. Whether you are short on wall space or simply prefer the portability, these mobile storage lockers let you use any open space for fast, easy access to gear and superior ease of cleaning. Each bank of lockers is mounted to a heavy-duty, welded frame and includes either four locking casters, levelers or floor mounts.

Personnel Lockers

GearGrid's Personnel Lockers provide a durable, functional and modular storage solution for any fire station. The open grid design promotes maximum air movement, which minimizes odor build-up and allows damp items to dry faster. Above-floor mounting eliminates the need for a separate base and makes cleaning easier than ever. The integrated, hinged seat eliminates the need for additional benches, creating a more open floor plan.

- Width 18", 24" & 30"
- Depth 30-1/2"
- Height 70"
(77" to 80" overall height when mounted)
- *Note: Mobile Lockers only available in 18" and 24" widths

Padlock Hasp on Seat
(Lock not included)

Suffolk & Miami Systems

GearGrid's multi-functional Suffolk and Miami Systems are designed for safe gear storage and transport. Now available in fixed and mobile configuration options, the system's versatility allows for storage of both cylinders and duty bags, with the added flexibility of shelf adjustability in 3" increments. The system's heavy-gauge, square tube frame construction is finished with a Super Durable, interior/exterior grade TGIC powder coating.

Padlock Hasps
Provide complete locking capability for added security, lock not included

Locking Casters
Locking casters handle up to 950 lbs. each

Miami

Seattle Equipment Storage System

The Seattle Equipment Storage System provides three storage openings each 24 W x 32 D x 72 H. The Seattle is available in a mobile platform or it can be floor mounted if a fixed location is desired. Hang-bars can be added for hanging gear, and flat shelves can be mounted in each opening for additional storage and are adjustable in 3" height increments. Completely modular, GearGrid's Seattle Equipment Storage System can be designed to your exact needs.

Seattle System
Width 75"
Depth 32"

Mini Mobile O₂ Cylinder System

- Designed to accommodate up to 32 O₂ cylinders
- Can be used in conjunction with hose, flat or SCBA shelves

Five-Shelf Mini Mobile Hose System with Winder

- Each shelf has a unique adjustable "book-end" ensuring hose is always stored upright
- Accommodates up to 1000' of 2-½" hose
- Winder accommodates hoses up to 3" in diameter
- Stores hose sizes ranging from 1-½" – 3" and a variety of cylinder sizes

"We gathered information about GearGrid as well as their main competitor that looks a lot like them. On two separate occasions at two separate locations, we heard the vendor (competitor) answer the question about how to fix broken welds with the same answer: JB Weld. This information allowed us to request GearGrid, and ensured our Department a quality made product."

-Chief Jim Aslinger Sale Creek Volunteer Fire Department, Sale Creek, TN

Accessories

GearGrid's innovative accessories provide the ultimate solutions to your unique storage challenges. From our Power Bar providing fast, easy access for charging cell phones, flashlights, or radios, to our one-of-a-kind Stow-Away Seat for added convenience and comfort, GearGrid heard your needs and responded with the options you need. All built with the same heavy-duty steel and attentive craftsmanship as the rest of our line, GearGrid accessories let you organize your space, your way.

Power Bar™

GearGrid's Power Bar adds an electric receptacle opening to each locker. Can be installed on both new and existing GearGrid Storage Systems. Electrical service, receptacle outlet and wiring supplied by customer's licensed electrician.

Available for:
18", 20" & 24" Wall Mount & Mobile Lockers 4' & 6' Slinger Workstations

*Note: Does not require UL listing. Please check with appropriate officials regarding local requirements. The height for Mobile/Free Standing Lockers with Power Bars is 85"H. The Power Bar Rail does not accept a USB type receptacle and some GFI outlets because of depth restrictions.

Charging Station

GearGrid's Charging Station is ideal for storing and charging equipment, such as radios and flashlights between calls. The Charging Station base is 4-1/4" x 5-1/4".

Binder Rack

Provides quick and easy access for training manuals, larger mail items – whatever you need to keep handy.

GearDryer™

The GearDryer is a stainless steel hanger that holds a jacket open.

GearHanger™

The GearHanger is a horizontal hanging rod with long-lasting stainless steel construction.

HeavyHanger

GearGrid's HeavyHanger is constructed on 1/4" stainless steel, and is the strongest traditional hanger you will find on the market.

Trouser Hanger

Our stainless steel HeavyHanger coupled with strong stainless steel clips.

GearGlove™

Constructed of stainless steel, this smart option helps gloves hold their shape while speeding the drying process.

Helmet Holder™

Protect ratcheting headgear with this innovative yet simple accessory, powder coated for long-lasting durability.

*Note: Not recommended to be used with Secure Door or Top-Side Storage.

Retro-Fit Door

Add complete locking capability to existing wall mount, mobile or free standing systems. Only available for 20" depth locker systems.

Stow-Away Seat™

The GearGrid Stow-Away Seat folds into the locker for compact storage. Has a capacity of 250 lbs. and available on new or existing GearGrid wall- and floor-mount systems.

*Note: Cannot be used with Secure Door or Mobile Locker Systems.

SecureBox™

The SecureBox provides a safe location for personal items.

Available Sizes:
Regular: 6" W x 6" H x 12" D
Large: 6" W x 12" H x 12" D

Backboard Rack

- Super Durable powder-coated set of 2 racks (top and bottom) fits both 20" and 24" locker widths
- Adjustable in 3" increments; holds up to five backboards per rack
- Includes heavy-duty Velcro straps to hold boards in place
- Optional bottom basket allows for outside of locker storage

*Note: Cannot be used with Secure Door or Top-Side Storage.

Top-Side Storage™

GearGrid's Top-Side Storage allows you to store additional gear or bulky items on top of lockers. A great option for storing a second set of gear. Can be installed on both new and existing GearGrid storage systems.

Note: Cannot be used with Secure Door.

Drop Shelf

Store additional gear and equipment underneath both new and existing GearGrid Storage Systems. A great option for storing a second set of gear.

*Note: Cannot be used with Mobile Locker Systems.

Fire Bench

GearGrid Fire Bench's rugged construction coupled with a rich-wood look makes it a perfect addition to any facility. Well-balanced and supported, the bench provides a solid and safe seating platform.

Size: 72" L x 20" W 21" H

Frame: Heavy-duty steel tubular frame system

Top: 1-5/8" MDF core laminate

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: Laminate Wild Cherry top, 7 standard base colors

Assembly: With simple tools it's fast and easy

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Slinger Workstation

The GearGrid Slinger Workstation features a heavy-duty work surface, as well as safe storage and convenient, easy access to tools and equipment. Individual units easily transport through halls and doorways, allowing the workstation to be brought to the equipment for safer, easier loading/unloading. Interchangeable, adjustable, flat shelves for tools and supplies, are also available.

6' Slinger Workstation
with optional attached Slinger Tool Grid and Shelf

4' Slinger Workstation
with optional attached Slinger Tool Grid and Shelf

Width 51", & 75"
Depth 30"
Height 41"

Frame: Heavy-duty 1-1/4" steel tubing
Side & Back Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern
Secure Doors: 1-1/4" heavy-duty tubing with high-strength 1/4" wire, 3" x 3" square grid pattern *Note: Must be specified in initial quote request and order. Locks not included
Casters: Locking casters handle up to 950 lbs. each
Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Slinger Workstation Accessories

Tool Holders
Store a variety of tools and equipment for convenient, easy access.

Workstation Pad
Safeguard your work surface from tool damage with this non-slip neoprene work pad.

Secure Doors
Provide complete locking capability for added security.

Pull-Out Tool Drawer
A convenient storage space for tools and equipment. Drawers can be stacked for additional storage space.

Power Bar
Add Power Bar to the Slinger for easy access to electrical outlets for your power tool needs *Note: Does not require UL listing. Please check with appropriate officials regarding local requirements. Electrical service, receptacle outlet and wiring supplied by customer's licensed electrician. The Power Bar Rail does not accept a USB type receptacle and some GFI outlets because of depth restrictions.

Dive Locker Deluxe™ Storage System

GearGrid's Dive Locker Deluxe offers the latest development in the proper storage and drying of dive gear including wet suits and dry suits as well as other oversized protective gear, such as CBRN. With its patented extended shock system, oversize gear is allowed to fully extend ensuring proper drying and storage resulting in longer lasting gear. With this system, GearGrid also introduces split secure storage with individual locking doors creating maximum use of space while ensuring individual security.

- Extended shock dive hanger can be purchased separately and/or used in other select GearGrid products
- Unit available with or without doors
- Shelves adjustable in 3" vertical increments
- SCUBA and flat storage shelves available with system

Frame: Heavy-duty 1-1/4" steel tubing

Side & Back Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern

Secure Doors (Optional): 1-1/4" heavy-duty tubing with high-strength 1/4" wire

Casters: Locking casters handle up to 950 lbs. each

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

Mobile Hose Dryer

GearGrid's mobile hose drying system promotes faster hose drying within a limited amount of space. Constructed with durable steel tubing and a strong wire grid system, it dries up to 200' of 2-1/2" and 350' of 1-1/2" hose simultaneously (in 50' lengths). The optional hose winder, with removable handle, makes rolling hose a breeze.

Width 125"
Depth 36"
Height 65"
(Without hose winder)

- Frame:** Heavy-duty tubing 1-1/4" steel tubing
- Grids:** High-strength 1-1/4" steel wire, 3" x 3" square grid pattern
- Casters:** Locking casters handle up to 250 lbs. each
- Finish:** Super Durable TGIC powder coat, optional anti-corrosive primer available
- Colors:** 7 standard colors
- Shipping:** Ships knocked down for ease of handling and reduced shipping costs
- Assembly:** With simple tools it's fast and easy

Locking Casters

Locking casters handle up to 250 lbs. each

Hose Winder

Allows for a quick and convenient winding process, length of hose winder is 31"

Note: Total unit length with the Hose Winder is 156"

Wall Mount Hose Dryer

For a permanent solution, our Wall Mount Hose Dryer can be mounted virtually anywhere. The open wire grid system promotes maximum air movement, providing one of the most economical hose drying options available.

Width 312"
Depth 18-1/2"
Height 36"

- Frame:** Heavy-duty 1-1/4" steel tubing
- Grids:** High-strength 1/4" steel wire, 3" x 3" square grid pattern
- Finish:** Super Durable TGIC powder coat, optional anti-corrosive primer available
- Colors:** 7 standard colors
- Shipping:** Ships knocked down for ease of handling and reduced shipping costs
- Assembly:** With simple tools it's fast and easy

Windsor Outdoor Hose Drying Rack

Developed for the Windsor, CA Fire Department, this unique system provides a convenient outdoor solution for drying hoses of all types and sizes. Great for warm climates, it's an ideal alternative to the high initial cost and liability implications of hose towers. Raised platform prevents hoses from getting soiled, as would happen when dried on the ground or pavement.

Width 5'
Length 48'
Height 3-1/2"
(With 12" slope)

- Frame:** Heavy-duty 1-1/2" steel tubing for supports and 1-1/4" for frames
- Grids:** High-strength 1/4" steel wire, 3" x 3" square grid pattern
- Finish:** Epoxy primer with TGIC powder topcoat for exterior corrosion protection
- Colors:** 7 standard colors
- Shipping:** Ships knocked down for ease of handling and reduced shipping costs
- Assembly:** Stainless steel hardware all included

Heavy-Duty GRP Hose Winder

- Winds up to 5" diameter LDH hose
- Optional wall mount bracket available
- 2:1 gear ratio for winding ease
- Fits standard 2" receiver hitch

GearCart with Hose Dryer Attachment

Add the Hose Dryer Attachment to the GearCart for the ultimate hose drying solution. Loop hose through the attachment for a quick, convenient drying process. The heavy-duty design allows fire departments to dry hose within a limited amount of space.

Width 75"
Depth 26-1/2"
Height 82"

- Frame:** Heavy-duty 1-1/4" steel tubing
- Side & Back Grids:** High-strength 1/4" steel wire, 3" x 3" square grid pattern
- Casters:** Locking casters handle up to 950 lbs. each
- Finish:** Super Durable TGIC powder coat, optional anti-corrosive primer available
- Colors:** 7 standard colors
- Shipping:** Ships knocked down for ease of handling and reduced shipping costs
- Assembly:** With simple tools it's fast and easy

Air Pack Rack

Provides convenient, accessible and movable storage for up to eight packs, and six spare SCBA cylinders. Ideal for training, industrial firefighting, Hazmat applications, and storage of spare air packs.

- Customizable to any cylinder bracket
- Available in larger size to accommodate 12 air packs and 12 spare cylinders

Also available:

- Heavy-duty pneumatic tires
- Zico Air Pack Brackets
- Protective cover

Width 37" & 70"
Depth 30"
Height 58"

Locking Casters

Locking casters handle up to 950 lbs. each

Zico Bracket

Optional Zico Air Pack Brackets conveniently hold cylinders and air packs on the system

Frame: Heavy-duty 2" steel tubing

Cylinder Shelves: High-strength ½" steel rod

Support Options: 950 lb. capacity locking casters or 300 lb. capacity pneumatic tires; adds 3" to overall height

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

SCBA & O₂ Cylinder Carriers

4 place SCBA

- Easy, convenient cylinder transport
- SCBA available in 5-¾", 7, and 7-¾" dimensions

6 place SCBA

- O₂ designed to fit up to 4.3" radius cylinders
- Available in all standard GearGrid colors

8 place O₂

Station Wagon

GearGrid's Station Wagon is ideal for transporting cylinders, hose and related equipment within the fire station and on apparatus. Designed in conjunction with the cylinder carriers to address both health and safety initiatives within today's fire service by minimizing lifting related incidents while ensuring proper and secure on-board storage.

- Easy maneuvering with nearly zero turning radius
- Multiple accessories and configurations available
- Quick and easy assembly with simple tools

Width 30"
Depth 52-½"
Height varies by accessory

Frame: Heavy-duty 1-¼" steel tubing

Tires: Standard with 15-½" dia. pneumatic tires rated at 350 lbs. each, optional 15-½" dia. NeverFlat tires rated at 500 lbs. each available upon request

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

"GearGrid was chosen as the PPE storage solution for the new Rayleigh Weir station. It really does the job and we are extremely happy with its performance and versatility."

— John Philpott of Essex Fire and Rescue Property Services, United Kingdom

Station Wagon with Aluminum Tub

Affixes to existing Station Wagon base and is secured with bolts on all four corners. Constructed out of aluminum to reduce weight without compromising durability.

Double SwingOut Tool Grid

Single SwingOut Tool Grid

Single SwingOut Tool Grid (Open)

Single SwingOut Tool Grid (Closed)

SwingOut Tool Grid

When every second counts, fast access to well organized tools is critical. GearGrid's SwingOut Tool Grid provides full visibility, making it easy to locate, grab and go. The system's adjustable, stainless steel tool holders let you configure and maximize your storage space just the way you want it.

Constructed of heavy gauge steel tubing and high strength 1/4" diameter wire, GearGrid SwingOut Tool Grids feature a Super Durable TGIC powder coating, in high visibility red or any of seven other standard color options, with custom colors available. SwingOut Tool Grids include exterior safety light and high visibility reflective tape for enhanced safety.

- Minimum compartment sizes apply
- Max tool grid panel size 64-3/4" wide x 44-3/4" high

- Single and double grid options
- View-through design for fast access
- Assists in managing inventory
- Lightweight construction
- Contact GearGrid for minimum and maximum allowable dimensions
- Ideal for use in all styles of apparatus, including rescue trucks, pumpers and ladders
- 60 lb. gas shock with ball-joint fittings assist in easy open/closing
- Positive latching mechanism standard with each unit
- Unit ships assembled for easy installation
- Independent back wall tool grids also available
- All tool grids come standard with a stationary back-grid

5 Stainless Steel Tool Holder Options

Axe Head Holder

Pickhead Axe Holder

Maul Head Holder

D-Handle Holder

Secure Tool Holder

PullOut Tool Grid

Our revolutionary PullOut Tool Grid provides the same fast access and ease of organization of the SwingOut System, in a pullout configuration. Tools can be mounted to one or both sides of this tough, powder-coated steel storage system.

- View-through design for fast access
- Assists in managing inventory
- Lightweight construction
- Ideal for use in all styles of apparatus, including rescue trucks, pumpers and ladders
- 5 stainless steel tool holder options to choose from:
 - › Axe head holder
 - › Pickhead axe holder
 - › Maul head holder
 - › D-Handle holder
 - › Secure tool holder

PullOut Tool Grid (Open)

"We specified GearGrid lockers, air bottle racks and a mobile hose dryer for our new engine house. Their staff designed our turn-out rooms and we were completely satisfied. So much so, we recently specified GearGrid's tool board for our new Spencer Mfg. engine. We can store twice as many tools on these boards, compared to a solid board. Being see through, allows our firefighters to see the tool they need, a real time saver"

- Chief Jay L. Hawley, Napoleon Twp. MI

Broom Center & Wash Center

GearGrid's Broom Center & Wash Center are made of durable steel with a resilient powder coat finish. This system helps organize and extend the life of your cleaning supplies.

Height	25-1/4"
Length Available in	4', 5' & 6'

Broom Center Includes:

- 4' Unit: 3 Large Tool Hangers & 1 Four-Prong Rack
- 5' Unit: 4 Large Tool Hangers & 1 Four-Prong Rack
- 6' Unit: 5 Large Tool Hangers & 1 Four-Prong Rack

Wash Center Includes:

- 4' Unit: 3 Large Tool Hangers & 1 Four-Prong Rack
- 5' Unit: 3 Large Tool Hangers & 2 Four-Prong Racks
- 6' Unit: 4 Large Tool Hangers & 2 Four-Prong Racks

Frame: Heavy-duty 1-1/4" steel tubing

Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Assembly: With simple tools it's fast and easy

Broom Center

Wash Center

Vehicle Detail Center

The GearGrid Vehicle Detail Center turns your wash bay into an organized and efficient environment. Keep your wash, maintenance and cleaning materials in one convenient location.

Width	33-3/4"
Depth	22"
Height	54-1/4"

Frame: Heavy-duty 1-1/4" steel tubing

Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern

Casters: Locking casters handle up to 950 lbs. each

Shelves: High-strength 1/4" wire

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

LA Drying System

GearGrid's LA Drying System provides organized storage and is ideal for drying damp garments. Its heavy-gauge construction includes eight gusseted corner brackets and reinforced base frame. The system also includes a stainless steel hang-bar.

Width	75"
Depth	20"
Height	82"

Base & Frame: Heavy-duty 1-1/4" steel tubing

Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern

Casters: Locking Casters handle up to 950 lbs. each

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

GearCart

Designed similar to our LA Drying System, the GearCart now offers more space for drying and storing PPE gear. The added 3" x 3" square grid center divider allows for stainless steel hang-bars and flat shelves to be mixed and matched to meet your exact storage needs.

Width	75"
Depth	26-1/2"
Height	82"

Base & Frame: Heavy-duty 1-1/4" steel tubing

Grids: High-strength 1/4" steel wire, 3" x 3" square grid pattern

Casters: Locking casters handle up to 950 lbs. each

Finish: Super Durable TGIC powder coat, optional anti-corrosive primer available

Colors: 7 standard colors

Shipping: Ships knocked down for ease of handling and reduced shipping costs

Assembly: With simple tools it's fast and easy

Locker Shields

GearGrid's Locker Shields are ideal for protecting gear from dust and debris between uses, or to deter removal of gear in shared-use facilities. Shields protect gear from harmful UV rays, helping prolong the life of your gear.

- Fabric:** Sewn with UV resistant polyester thread
- Colors:** Blue, Red, Black, Grey, and custom colors available
- Printing:** Custom logos available; 13" and 24" width options

Total Coverage Locker Shield

- Available for new or existing Mobile Lockers (Custom sizes also available)
- Nylon zippers, both ends. Roll-up Velcro ties

End cap Locker shield

- Available for new or existing Wall Mount and Mobile Lockers (Custom sizes also available)
- Heavy-duty 1/4" internal wire support
- Secures with built-in Velcro straps

Topside Locker shield

- Available for new or existing Mobile Lockers (Custom sizes also available)
- 1-1/4" heavy gauge tubular frame

CASE Study

The Eagan, MN Fire Department

Fire Departments are constantly faced with the important decision of how to properly store and protect their turnout gear. For one Minnesota Fire Department, they were ready to find something different to match their department's transformation.

After years of using homemade metal units with hooks and shelves from the hardware store, the Eagan, MN Fire Department knew it was time to find a product that would properly store their gear.

While touring fire stations prior to the start of the design process, the Eagan team discovered GearGrid. What immediately caught their eye was GearGrid's sleek design and superb build quality. The fact that all GearGrid products are manufactured in the USA and are specifically made to store personal protective equipment (PPE) sealed the deal.

However, what the department began to discover was GearGrid's hidden treasure: the abundance of additional storage solutions with the ability to customize products more than any other manufacturer in the industry.

One of those customizations was the unique color choice for their turnout lockers in their new station. In honor of the Minnesota Vikings professional football team building their new headquarters and practice facility in Eagan, GearGrid had their in-house powder coating team transform their lockers into a purple and gold Vikings tribute.

More Than Just Turnout Gear Lockers: One Fire Department's Quest for the Perfect Storage Solution

In the design of the new facility, it was important for the department to have a designated room off the apparatus floor for storing PPE gear for their entire combination staff. Unfortunately, in the designated area, there was only room for half of the necessary lockers. GearGrid's solution was their Free Standing Tube Wall Structure. The island configuration allows lockers to be mounted on both sides, providing more locker openings where wall space does not allow. With the creativity of GearGrid, Eagan was able to satisfy their needs, and have a locker opening for each firefighter.

GearGrid was exactly the answer the Eagan Fire Department was looking for. Not only were they able to assist with solving their PPE storage challenges, but GearGrid also addressed several other challenges they did not think were possible. Eagan continues returning to GearGrid due to the high quality of their products and outstanding customer support. The department admires GearGrid's ability to listen to the fire industry's changing needs and adapt their products accordingly.

As the department looks forward to the future, they are excited to continue working with GearGrid in pursuit of their next storage achievement.

GearGrid Bed Frame Set

Just like the rest of our products, the GearGrid Bed Frame Set is built with only heavy-duty materials for ultimate durability. The Bed Frame Set includes, a Headboard, Footboard, and Puffy Foundation Frame. To best meet the needs for your space, choose from two different set options to ensure the perfect fit. Each headboard will include a laser cut Maltese cross at the top, with custom options available. Further customize the Bed Frame Set by choosing from any one of our 7 standard color options (See back page).

1 Option #1: Twin XL

Headboard:

- Material: Heavy-duty 2" round steel tube and high-strength ¼" steel wire
- Size: 40"W x 42"H
- Laser Cut Maltese Cross: 14" x 14"

Footboard:

- Material: Heavy-duty 2" round steel tube and high-strength ¼" steel wire
- Size: 40"W x 21"H

Puffy Foundation Frame:

Size: 38-½"W x 79-½"L

Note: 14-½" Underside storage clearance

2 Option #2: Full

Headboard:

- Material: Heavy-duty 2" round steel tube and high-strength ¼" steel wire
- Size: 56"W x 42"H
- Laser Cut Maltese Cross: 14" x 14"

Footboard:

- Material: Heavy-duty 2" round steel tube and high-strength ¼" steel wire
- Size: 56"W x 21"H

Puffy Foundation Frame:

Size: 53-½"W x 74-½"L

Note: 14-½" Underside storage clearance

GearGrid Nightstand

The GearGrid Nightstand is the perfect addition to any fire station dorm room. Built with GearGrid's rugged durability, the Nightstand is constructed with only the most durable materials. Each top is made from heavy-duty, black HDPE that is impervious to water. Customize the Nightstand by choosing from any one of our 7 standard color options.

Nightstand:

- Material: Heavy-duty 1-1/4" steel tube and high-strength 1/4" steel wire
- Size: 22"W x 21"D x 26"H
- Electrical Connections
 - (1) Standard Outlet
 - (2) USB Ports
